Childrens

THE NATURAL HISTAMINE BLOCKER: CLINICAL STUDIES

IMMUNEAE

Numerous clinical studies were conducted to confirm the efficacy of quail egg on the reduction of rhinitis symptoms acutely experienced by subjects upon exposure to a cocktail of common outdoor and indoor allergens.

Study 1 - A proprietary blend of quail egg for the attenuation of nasal provocation with a standardized allergenic challenge: a randomized, double-blind, placebo-controlled study.

Sample: 43 subjects (25 males, 23 females).

Study 2 - Efficacy of a Quail Eggs-Based Dietary Supplement for Allergic Rhinitis: Results of a Single-Arm Trial.

Sample: 77 patients (44 males, 33 females).

Study 3 - Evaluation of the efficacy and safety of preparation **Strallergium®** in patients with atopic dermatitis.

Sample: 281 patients.

- Immediate relieve from allergy symptoms : within 10-15 minutes (for 2 hours)

- Fast acting benefits: natural bioactives derived from quail eggs (ovomucoids)

- Excellent safety profile : no toxic or deleterious effects have been described so far

- Significant improvement in symptoms in patients suffering from allergic rhinitis and reduced reliance on standard symptomatic medications

A systemic review of clinical studies evaluating the efficacy of quail-eggs supplements as on integrative remedy for treating allergic rhinitis.

Quail Eggs-Based Supplements in Allergic Rhinitis:
A Systematic Review of Clinical Studies.
Based on 284 studies.

INNOVANT

The only fast acting natural supplement to reduce allergy symptoms.
