Algalithe®

MARINE NUTRITIONAL COMPLEX

Marine mineral complex enhance bone health

Algalithe®
MARINE NUTRITIONAL COMPLEX

Bioactive red algae calcium
Digestive health & gut wellness

Source & sustainability: Harvested sustainably from Lithothamnion calcareum, a calcified red seaweed found in cold Atlantic waters. More than 32% of Calcium in two forms (calcite and aragonite) and more than 2% Magnesium along with 71 trace elements

Mechanism of action: Features a highly porous, honeycomb-like physical structure. This macro-porosity provides a large surface area that acts as a natural, progressive antacid to buffer physiological gastric pH without causing sudden acid rebounds.

Key benefits:
– Delivers highly bioavailable calcium and magnesium.
– Neutralizes excess stomach acid to balance acid reflux.
– Supports long-term bone and joint mineral density.

Application profile: Neutral taste and off-white color. Ideal for clean-label tablets, capsules, powder sachets, and functional beverages
Available in two particle sizes depending on the final applications: 25 microns and 150 microns.

Product composition

– Greater than 32% Elemental Calcium

– Greater than 2% Elemental Magnesium

– 71 Trace Minerals

Posology & usage

500mg, taken 1 to 5 times per day.

Quality & regulatory status

– Shelf life: 3 years.

– Quality certifications: Halal, Kosher, Vegan, Non-GMO (NGPV in process), and FSSC 22000.

– Country of origin: France. Harvested from a red macroalgae of the Corallinaceae family (lithothamnion) in the North Atlantic.

Sustainability: Harvested in a sustainable manner, in partnership with 1% for the Planet
