Nutraquinone

Vitamin K2 MK-7 Evolution

99.9% or greater all-trans purity

Nutraquinone

Vitamin K2 MK-7 Evolution

Ultra-pure vitamin K2 (MK-7)
Bone, joint & dental health

Composition: Premium Menaquione-7 (MK-7) certified at 99.9% or greater purity, featuring a superior "all-trans" geometric configuration.
The "cis" isomers found in low-quality K2 are biologically inactive; Nutraquinone® ensures virtually 100% active "trans" molecules.

Mechanism of action: Activates specific proteins like Osteocalcin (which binds calcium to the bone matrix) and Matrix Gla Protein (MGP, which inhibits calcium buildup in blood vessels).

Key benefits:
– Cardiovascular safety: Prevents arterial calcification by directing calcium away from arteries.
– Bone optimization: Maximizes the skeletal benefits of calcium and Vitamin D3.

Application profile: Exceptional structural stability in complex formulations, especially when blended with aggressive minerals like calcium or magnesium. Available in powder and oil form.

Product composition

– 99.9% or Greater All-Trans Vitamin K2 (MK-7).

Quality & regulatory status

– Manufacturing: Manufactured in a cGMP, leading-edge facility.

– Shelf life: 3 years.

– Quality certifications: cGMP, FSSC 22000, HACCP, FDA Registered, Kosher, Halal, and Non-GMO.
